Please join us...

Our mission is to restore the Hawai'i Kai wetland and malama the nesting grounds for the critically endangered endemic 'Alae 'ula.

According to the 2005 Fish and Wildlife report, there are estimated three to four hundred 'Alae 'ula in the world, inhabiting only O'ahu and Kauai. Because of this, the restoration and maintenance of this little wetland would greatly benefit this species.

Photo: Alae'ula chick

Each little wetland pocket helps to maintain the well-being and genetic diversity of wetland species in Hawaii.

Livable Hawaii Kai is a 501c(3) non-profit, nonpartisan community action group serving East Honolulu since 2004. We strive to promote sensible growth and respect for the land as well as uphold the integrity of the East Honolulu Sustainable Communities Plan.
